

Statement of Purpose

Program: Post Graduate Certificate Programmer in Applied Data Science & Artificial Intelligence

Institution: IIT Roorkee

Applicant: Amit Kumar

I completed my Bachelor's degree (**BTech**) in Computer Science **from Biju Patnaik University of Technology, Rourkela, Odisha, in 2011**. These academic experiences gave me a solid grounding in programming, algorithms, and system design, while also allowing me to explore problem-solving through research-oriented projects. Soon after, I began my professional career as **Intern Software Developer at Krish Techno labs Private Limited** and Currently working with **HCL Tech Ltd as Sr. Technical Lead**.

Over the last twelve years, I have transitioned into the role of Sr. Tech Lead roles, managing cross-functional teams responsible for developing large-scale enterprise applications across telecom and healthcare industries. While my role has helped me master software development life cycles and leadership responsibilities, I increasingly realize that modern enterprises require more than scalable software—they need intelligent, AI-driven systems capable of predictive analytics, automation, and personalization.

My mission is to blend my software engineering expertise with applied AI to design business-critical solutions that improve efficiency and create real value. My vision is to evolve into a technology leader who spearheads AI adoption across industries and ensures that businesses transition smoothly into a data-driven future.

The IIT Roorkee program stands out for its balance between technical rigor and practical application. The modules on machine learning, natural language processing, and deep learning will help me build a solid technical foundation in AI, while hands-on experience with Python and TensorFlow will strengthen my ability to build production-ready models. The capstone project, in particular, excites me as it will allow me to apply theoretical knowledge to a real-world scenario

In the next five to 10 years AI booms, I see myself advancing into leadership roles such as AI Practice Lead / Engineering Head / AI Lead in some good Originations, where I will guide teams in designing innovative AI-powered products, mentor younger professionals, and influence organizational technology strategies. With the expertise gained from this program and my strong desire to keep learning, I am confident of contributing meaningfully to AI-driven digital transformation initiatives.

With my 12years it experiences, passion for innovation, and IIT Roorkee's academic excellence, I am confident this program will empower me to contribute meaningfully to the **AI-powered future of IT Industry and beyond**.

Sincerely, **Amit Kumar**
